DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 30 March 2021 at 09:15 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will predominantly be Low across the UK today. However, some elevated areas of air pollution are currently being observed across parts of South Wales and the Northern Isles where air pollution levels will be Moderate at times.

Tomorrow: Very warm and sunny conditions may cause air quality to worsen across England and Wales with Moderate or perhaps even locally High pollution levels possible, mainly around urban areas. Isolated pockets of Moderate air pollution also remain possible in northern Scotland.

Outlook: Warm and sunny weather becomes confined to southwest England and southwest Wales on Thursday where air pollution levels may remain Moderate or possibly High here. Elsewhere on Thursday, air pollution is likely to be Low with most of the UK returning to Low through Friday and Saturday, although with a continued risk of Moderate pockets across Scotland.
